

All areas, ratios, extents, and project counts on this board trace back to geometry*.geojson, metrics.json, and compliance_matrix.json.
Provisional boundary is not an official redline; full recalculation when official data arrives.
Conceptual suggestions for professional deepening; not government-approved conclusions.

City of Flow · Jing-Zhang AI Metabolism Belt — Overall Concept

One Belt (metabolic spine) · Three Cores (organs) · Two Wings (empowerment) · Many Nodes (circulation)

Jing-Zhang green spine (metabolic axis)

- Jing-Zhang green spine (metabolic axis)
- Public space nodes (plazas/forecourts)
- Metabolism nodes (edge-compute station + scenario interface, cc)
- AI pilgrimage landmarks (3, conceptual)
- Key-area provisional extents
- Provisional boundary

Three cores · three organ roles

- Zhongzhiyuan AI Acceleration Area**
Innovation Heart · full-stack
- Beijing AI Origin Community**
Exchange Interface · campus transfer
- Dazhongsi AI Industry Cluster**
Circulation Hub · station-city

Overall design area
approx. 11.4 km²

Provisional rough boundary — not an official redline; full recalculation once official data arrives

Source: repository provisional boundary and announcement boundary text; announcement overall design area approx. 11.4 km²; areas recomputed in EPSG:4548. Conceptual suggestions, not statutory planning.

All areas, ratios, extents, and project counts on this board trace back to geometry*.geojson, metrics.json, and compliance_matrix.json.
Provisional boundary is not an official redline; full recalculation when official data arrives.
Conceptual suggestions for professional deepening; not government-approved conclusions.

Land-Use Structure and Spatial Organization

Complete seamless partition · national land-use codes · green spine as metabolic axis

Provisional rough boundary — not an official redline

Source: geometry/land_use.geojson (recomputed in EPSG:4548); codes from site-package enums. Conceptual suggestions, not statutory planning.

Land-use area composition (ha)

Three-level scope transmission

All areas, ratios, extents, and project counts on this board trace back to geometry*.geojson, metrics.json, and compliance_matrix.json.
Provisional boundary is not an official redline; full recalculation when official data arrives.
Conceptual suggestions for professional deepening; not government-approved conclusions.

Mobility and Blue-Green Public Space Composite System

One spine · two links · seven stitches · many connections; blue-green fingers and plaza network

Legend

- Green-spine slow-mobility axis
- Conceptual link roads
- East-west stitching streets
- Xiaoyuehe cycleway
- Transit connections (conceptual)
- Jing-Zhang green spine
- Blue-green fingers
- Plazas / forecourts
- Scenario nodes

Typical green-spine section (conceptual)

Scenario carriers: SC-05 mobility companion · SC-06 station guidance · SC-11 stormwater sensi

Roads are conceptual centerlines, not road redlines; transit station positions pending official confirmation.
Source: geometry/roads.geojson, green_space.geojson, public_space.geojson; EPSG:4548. Conceptual suggestions, not statutory planning.

All areas, ratios, extents, and project counts on this board trace back to geometry*.geojson, metrics.json, and compliance_matrix.json.
Provisional boundary is not an official redline; full recalculation when official data arrives.
Conceptual suggestions for professional deepening; not government-approved conclusions.

Three Key Areas: Three Organ Roles

Provisional rectangle placeholders · announcement areas · positioning-moves-scenarios

1 Zhongzhiyuan AI Acceleration Area · Innovation Heart

Announced approx. 192.1 ha

Positioning: garden-style full-stack innovation district

Moves: strategic reserve north | R&D clusters & full-stack labs | Qinghe green edge

Scenarios: open testbed · red-team sandbox · standards workshops · low-carbon compute

2 Beijing AI Origin Community · Exchange Interface

Announced approx. 104.3 ha

Positioning: near-campus transfer and talent community

Moves: incubator blocks + talent apartments around publishing plaza | campus green belt stitching

Scenarios: open-source hall · transfer copilot street · age-friendly station

3 Dazhongsi AI Industry Cluster · Circulation Hub

Announced approx. 72.0 ha

Positioning: station-city intelligent economy & international gateway

Moves: four-quadrant plaza connections | station-city complex | commercial block renewal

Scenarios: roadshow salon · data showcase · AI night-economy wayfinding

Provisional key-area extents: the announcement gives no boundary text; rectangles are placeholders only, not parcels or road redlines.

Source: geometry/key_areas.geojson and announcement areas; EPSG:4548. Conceptual suggestions, not statutory planning.

All areas, ratios, extents, and project counts on this board trace back to geometry*.geojson, metrics.json, and compliance_matrix.json.
Provisional boundary is not an official redline; full recalculation when official data arrives.
Conceptual suggestions for professional deepening; not government-approved conclusions.

Source: repository provisional boundary and announcement boundary text; announcement overall design area approx. 11.4 km²; areas recomputed in EPSG:4548. Conceptual suggestions, not statutory planning.

All areas, ratios, extents, and project counts on this board trace back to `geometry/*.geojson`, `metrics.json`, and `compliance_matrix.json`.
Provisional boundary is not an official redline; full recalculation when official data arrives.
Conceptual suggestions for professional deepening; not government-approved conclusions.

Metric Recomputation and Evidence Chain

[GeoJSON](#) → recomputed in EPSG:4548 → `metrics.json` → [figures](#) / [HTML](#) / [PDF](#)

Spatial evidence (green / public / footprints / key areas)

Recomputed metrics (known)

Overall design area	11,412,825 m² (approx. 1141.3 ha)
Green ratio (green/site)	27.0%
Public-space ratio	2.4%
Building footprint area	499,602 m²
Building density (conceptual)	4.4%
Road centerline length (conceptual)	44,546 m
Key-area count	3
AI scenario cards	12
Personas	5
AI pilgrimage landmarks	3
Global case studies	6
Near-term phase area	1,331,457 m²

Pending official data (unknown)

Floor area ratio — pending regulatory controls
Building height control — pending regulatory controls
Road area — pending road redlines
Total floor area — pending FAR and boundary

Self-check status

- Deterministic validation PASS
- Spatial review PASS
- Visual packaging PASS
- Professional evidence PASS

Metrics inside the provisional boundary serve generation and discussion only; full recalculation once official polygons arrive.
